Pearson Edexcel GCSE
In Mathematics (1MA1)
Higher (Calculator) Paper 3H

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General marking guidance

These notes offer general guidance, but the specific notes for examiners appertaining to individual questions take precedence.

- 1** All candidates must receive the same treatment. Examiners must mark the last candidate in exactly the same way as they mark the first. Where some judgement is required, mark schemes will provide the principles by which marks will be awarded; exemplification/indicative content will not be exhaustive. When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the response should be sent to review.
- 2** All the marks on the mark scheme are designed to be awarded; mark schemes should be applied positively. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme. If there is a wrong answer (or no answer) indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.

Questions where working is not required: In general, the correct answer should be given full marks.

Questions that specifically require working: In general, candidates who do not show working on this type of question will get no marks – full details will be given in the mark scheme for each individual question.

3 Crossed out work

This should be marked **unless** the candidate has replaced it with an alternative response.

4 Choice of method

If there is a choice of methods shown, mark the method that leads to the answer given on the answer line.

If no answer appears on the answer line, mark both methods **then award the lower number of marks.**

5 Incorrect method

If it is clear from the working that the "correct" answer has been obtained from incorrect working, award 0 marks. Send the response to review for your Team Leader to check.

6 Follow through marks

Follow through marks which involve a single stage calculation can be awarded without working as you can check the answer, but if ambiguous do not award.

Follow through marks which involve more than one stage of calculation can only be awarded on sight of the relevant working, even if it appears obvious that there is only one way you could get the answer given.

7 Ignoring subsequent work

It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question or its context. (eg. an incorrectly cancelled fraction when the unsimplified fraction would gain full marks).

It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect (eg. incorrect algebraic simplification).

8 Probability

Probability answers must be given as a fraction, percentage or decimal. If a candidate gives a decimal equivalent to a probability, this should be written to at least 2 decimal places (unless tenths).

Incorrect notation should lose the accuracy marks, but be awarded any implied method marks.

If a probability fraction is given then cancelled incorrectly, ignore the incorrectly cancelled answer.

9 Linear equations

Unless indicated otherwise in the mark scheme, full marks can be gained if the solution alone is given on the answer line, or otherwise unambiguously identified in working (without contradiction elsewhere). Where the correct solution only is shown substituted, but not identified as the solution, the accuracy mark is lost but any method marks can be awarded (embedded answers).

10 Range of answers

Unless otherwise stated, when an answer is given as a range (e.g 3.5 – 4.2) then this is inclusive of the end points (e.g 3.5, 4.2) and all numbers within the range.

11 Number in brackets after a calculation

Where there is a number in brackets after a calculation E.g. $2 \times 6 (=12)$ then the mark can be awarded **either** for the correct method, implied by the calculation **or** for the correct answer to the calculation.

12 Use of inverted commas

Some numbers in the mark scheme will appear inside inverted commas E.g. "12" $\times 50$; the number in inverted commas cannot be any number – it must come from a correct method or process but the candidate may make an arithmetic error in their working.

13 Word in square brackets

Where a word is used in square brackets E.g. [area] $\times 1.5$: the value used for [area] does **not** have to come from a correct method or process but is the value that the candidate believes is the area. If there are any constraints on the value that can be used, details will be given in the mark scheme.

14 Misread

If a candidate misreads a number from the question. Eg. uses 252 instead of 255; method or process marks may be awarded provided the question has not been simplified. Examiners should send any instance of a suspected misread to review.

Guidance on the use of abbreviations within this mark scheme

M	method mark awarded for a correct method or partial method
P	process mark awarded for a correct process as part of a problem solving question
A	accuracy mark (awarded after a correct method or process; if no method or process is seen then full marks for the question are implied but see individual mark schemes for more details)
C	communication mark awarded for a fully correct statement(s) with no contradiction or ambiguity
B	unconditional accuracy mark (no method needed)
oe	or equivalent
cao	correct answer only
ft	follow through (when appropriate as per mark scheme)
sc	special case
dep	dependent (on a previous mark)
indep	independent
awrt	answer which rounds to
isw	ignore subsequent working

Paper: 1MA1/3H				
Question	Answer	Mark	Mark scheme	Additional guidance
1	Points plotted at (130, 12) (150, 28) (170, 30) (190, 22) (210, 8) and joined with line segments	B2 (B1	for correct plotting of 5 points and joining with line segments for points plotted correctly at midpoints or for a frequency polygon with one point incorrect or for a frequency polygon with first and last point joined directly or for joining the points with line segments at the correct heights consistent within intervals (including end points))	Ignore any histogram drawn Ignore any part of the frequency polygon outside of the range of the first and last point plotted. for example, at 120, 140, 160, 180, 200 or at 140, 160, 180, 200, 220
2	(a) 340 200 (b) 8.026×10^{-1}	B1 B1	cao cao	
3	Drawn	B2 (B1	for a correct construction with all relevant arcs drawn for all relevant arcs drawn or for a bisector within guidelines but with no or insufficient arcs)	
4	(a) (0.3) 0.7 0.3 0.7 0.3 0.7 (b) 0.49	B2 (B1 M1 A1	all probabilities correctly placed for 0.7 correctly placed for Game 1) for a correct method, ft their tree diagram eg 0.7×0.7 only oe, ft their tree diagram	Accept equivalent fractions or percentages for probabilities ft their diagram provided probabilities are less than 1 An answer of $\frac{0.49}{1}$ scores M1A0 unless 0.49 seen

Paper: 1MA1/3H				
Question	Answer	Mark	Mark scheme	Additional guidance
5	45.6	P1	for a process to start to work with the ratio, eg $240 \div (3 + 5) (= 30)$ or pens = $3n$ and pencils = $5n$ where n is a positive integer	Can work in £ or pence but must be consistent, 90 or 150 imply P1 This mark can be awarded at any stage
		P1	for a complete process to find the number of pens and pencils, eg “30” $\times 3 (= 90)$ and “30” $\times 5 (= 150)$ OR for process to find one cost or amount to sell for one item eg [pens] $\times 9 (= 810)$ or [pens] $\times 11 (= 990)$ or [pencils] $\times 6 (= 900)$ or [pencils] $\times 10 (= 1500)$ OR process to find the profit for one pen or one pencil eg $11 - 9 (= 2)$ or $10 - 6 (= 4)$	[pens] could be “30” $\times 3$ or their number of pens [pencils] could be “30” $\times 5$ or their number of pencils [pens] , [pencils] $\neq 1$
		P1	for a process to find the total cost to buy or the total amount to sell for both, eg [pens] $\times 9 +$ [pencils] $\times 6 (= 1710)$ or [pens] $\times 11 +$ [pencils] $\times 10 (= 2490)$ OR process to find the profit for one item eg [pens] $\times 11 -$ [pens] $\times 9 (= 180)$ or [pens] $\times (11 - 9) (= 180)$ or [pencils] $\times 10 -$ [pencils] $\times 6 (= 600)$ or [pencils] $\times (10 - 6) (= 600)$	180 or 600 or 780 implies P3 [pens] could be “30” $\times 3$ or their number of pens [pencils] could be “30” $\times 5$ or their number of pencils [pens] , [pencils] $\neq 1$
		P1	for a complete process to find the profit as a percentage or a decimal, eg $\frac{[2490] - [1710]}{[1710]} \times 100$ or $\frac{[2490] - [1710]}{[1710]} (= 0.456...)$ or for a process to find the amount to sell as a percentage of the cost eg $\frac{[2490]}{[1710]} \times 100 (= 145.6...)$	[2490] is their amount to sell for both pens and pencils [1710] is their cost of pens and pencils [2490] – [1710] may be [180] + [600]
		A1	answer in the range 45.6 to 45.62	If an answer is given in the range in working and then rounded incorrectly award full marks. A correct answer with no supportive working gets 0 marks

Paper: 1MA1/3H				
Question	Answer	Mark	Mark scheme	Additional guidance
6	Comparison	B1	for correctly identifying the median of (School) A as 57	If median for school B is stated in the comparison it must be correct
		C1	(ft, dep on value for the median being stated) for making a correct comparison of <u>median</u> eg 'the median of (School) A is higher than the median of (School) B'	
		B1	for correctly identifying the range of (School) A as 49	
		C1	(ft, dep on value for the range being stated) for making a correct comparison of <u>range</u> eg 'the range of (School) A is higher than the range of (School) B'	
7	10.2 and 10.3	B1	for 10.2 in the correct place	Accept 10.2 ⁹ or 10.299(99...)
		B1	for 10.3 in the correct place	
8	14.3	M1	for a correct statement for AB using trigonometry, eg $\tan 62 = \frac{AB}{7.6}$ or $(AB =) 7.6 \times \tan 62$	If an answer is given in the range in working and then rounded incorrectly award full marks
		A1	answer in the range 14.28 to 14.3	
9	(a) $14x^5y^6$	B2	cao	Where a, x^b, y^c can be made up of two products Condone inclusion of multiplication signs for B1
	(b) m^{-6}	(B1) B1	for correct simplification of two terms ax^5y^6 or $14x^by^6$ or $14x^5y^c$ where $a \neq 14, b \neq 5, c \neq 6$ for m^{-6} or $\frac{1}{m^6}$	

Paper: 1MA1/3H				
Question	Answer	Mark	Mark scheme	Additional guidance
10	55	M1 A1	for a complete method eg $46.75 \div 0.85$ oe or for a correct equation eg $0.85x = 46.75$ oe or 55 seen, then used as part of an extended method eg 8.75 or 101.75 accept trailing zeros eg 55.00	
11	304	P1 P1 A1	for start of process to find the arc length eg $34.3 - 2 \times 4.7 (= 24.9)$ or for forming a suitable equation eg $\frac{\angle AOB}{360} \times \pi \times 2 \times 4.7 + 2 \times 4.7 = 34.3$ for process to isolate the arc length in an equation eg $\frac{\angle AOB}{360} \times \pi \times 2 \times 4.7 = "24.9"$ or for complete process to find AOB eg $\angle AOB = \frac{"24.9" \times 360}{\pi \times 2 \times 4.7}$ answer in the range 303 to 304	Condone omission of the addition of 2 radii in the equation for this mark only eg $\frac{\angle AOB}{360} \times \pi \times 2 \times 4.7 = 34.3$ If an answer is given in the range in working and then rounded incorrectly award full marks

Paper: 1MA1/3H				
Question	Answer	Mark	Mark scheme	Additional guidance
12 (a)	4775.38	M1	for a method to find the value after 1 year, eg $4500 \times 1.024 (= 4608)$ oe	Award of this mark implies the first M1 May be seen in more than 1 calculation M2A0 is implied by 275.37 or 275.38 Correct answer not rounded to 2dp gains M2A0
		M1	for a complete method to find the value after 3 years, eg $"4608" \times 1.018^2$ or $"4608" \times 1.018 (= 4690.944)$ and $"4690.944" \times 1.018$ oe	
		A1	accept 4775.37 SCB1 for 4770 or 4824 if M0 scored	
(b)	26	P1	for a start to the process, eg $4107 \div 7500 (= 0.5476)$	0.74 implies P1
		P1	for a process to find percentage change eg $\sqrt{"0.5476"} \times 100 (= 74)$ or $(\sqrt{"0.5476"} - 1) \times 100 (= -26)$ or $1 - \sqrt{"0.5476"} (= 0.26)$	
		A1	cao	

Paper: 1MA1/3H				
Question	Answer	Mark	Mark scheme	Additional guidance
16	(7, 3.5)	P1	process to find the gradient of OB , eg $\frac{-4-0}{2-0} (= -2)$	
		P1	process to find the equation of DE , eg substitutes $(12, -6.5)$ into $y = "-2"x + c$ or $y = [-2]x + c$ or $y - -6.5 = "-2"(x - 12)$ or $y - -6.5 = [-2](x - 12)$	Equation of DE is $y = -2x + 17.5$ Where $[-2]$ can be $\frac{-1}{2}$ or 2 or $\frac{1}{2}$ and must be labelled as the gradient of OB
		P1	process to find the equation of OD , eg substitutes $(0, 0)$ into $y = \frac{-1}{"-2"}x + c$ or $y = \frac{-1}{[-2]}x + c$ or $y - 0 = \frac{-1}{"-2"}(x - 0)$ or $y - 0 = \frac{-1}{[-2]}(x - 0)$	Equation of OD is $y = \frac{1}{2}x$ Where $[-2]$ can be $\frac{-1}{2}$ or 2 or $\frac{1}{2}$ and must be labelled as the gradient of OB
		P1	(dep P3) forms an equation that can be solved to find x coordinate of D , eg $"-2x + 17.5" = "\frac{1}{2}x"$	
		A1	cao	A correct answer with no supportive working gets 0 marks

Paper: 1MA1/3H				
Question	Answer	Mark	Mark scheme	Additional guidance
17	56.0	P1	for a start to the process by correctly substituting into the cosine rule to find an angle eg, $18.2^2 = 14.6^2 + 7.9^2 - 2 \times 14.6 \times 7.9 \times \cos A$	
		P1	for rearranging to find $\cos A$, eg $\cos A = \frac{14.6^2 + 7.9^2 - 18.2^2}{2 \times 14.6 \times 7.9} \quad (= -0.2413\dots)$ or $A = 103.965\dots$	$\cos B = 0.9069\dots$ $B = 24.912\dots$ $\cos C = 0.6276\dots$ $C = 51.1222\dots$
		P1	for process to find the area of triangle ABC eg $\text{Area} = \frac{1}{2} \times 7.9 \times 14.6 \times \sin ("103.965\dots")$ or $\text{Area} = \frac{1}{2} \times 7.9 \times 14.6 \times \sin [A]$ $\text{Area} = \frac{1}{2} \times 14.6 \times 18.2 \times \sin ("24.912\dots")$ or $\text{Area} = \frac{1}{2} \times 14.6 \times 18.2 \times \sin [B]$ $\text{Area} = \frac{1}{2} \times 7.9 \times 18.2 \times \sin ("51.1222\dots")$ or $\text{Area} = \frac{1}{2} \times 7.9 \times 18.2 \times \sin [C]$	[A], [B], [C] must be a numerical value and clearly identified by labelling or on the diagram with no contradiction
		A1	for answer in the range 55.96 to 56.0	If an answer is given in the range in working and then rounded incorrectly award full marks

Paper: 1MA1/3H				
Question	Answer	Mark	Mark scheme	Additional guidance
18 (a)	200	P1	for $\frac{55}{11}$ (= 5) or $\frac{11}{55}$ (= 0.2) or $\frac{40}{11}$ (= 3.63..) or $\frac{11}{40}$ (= 0.275) or for starting to use ratio eg tagged : untagged = 11 : 44 oe	Allow decimal values truncated or rounded to at least 2dp
		P1	for $\frac{11}{55} = \frac{40}{n}$ or $\frac{11}{40} = \frac{55}{n}$ or $\frac{55 \times 40}{11}$ oe or for process to find the number of untagged frogs eg $\frac{55 - 11}{11} \times 40$ (=160)	May be seen in ratio eg 40 : 160
		A1	cao	A correct answer with no supportive working gets 0 marks.
(b)	Assumption	C1	for a suitable assumption, Acceptable examples no frogs have left/arrived at the lake no tags have fallen off / no lost tags sample of frogs taken was a random sample / this is a representative sample tagged frogs are distributed around the lake no baby frogs / no frogs have died There are (still) 4 untagged for every tagged frog. The tagged frogs had time to blend into the population. It is a closed environment There aren't any more frogs in the lake No other frogs in the lake Not acceptable examples She has caught all the frogs There are lots of frogs. This is the same lake	

Paper: 1MA1/3H				
Question	Answer	Mark	Mark scheme	Additional guidance
19	6	P1	for starting process, by defining height, radius and using Pythagoras to form an equation for the slant height l eg height = h, radius = $\frac{3}{4}h$ and $l^2 = h^2 + \left(\frac{3h}{4}\right)^2 \left(= \frac{25}{16}h^2\right) \text{ or } (l =) \sqrt{h^2 + \left(\frac{3h}{4}\right)^2} \left(= \frac{5}{4}h\right) \text{ oe}$ eg $r = 3x$ and $h = 4x$ and $l^2 = (3x)^2 + (4x)^2$	Can use any other letter than h provided it is defined eg height = x
		P1	(dep P1) for process to form a correct expression for the curved surface area in terms of a single variable, eg $\pi \times \frac{3}{4}h \times \frac{5}{4}h \left(= \frac{15}{16}\pi h^2\right)$ or $\pi \times 3x \times 5x$ where $h = 4x$	May include area of circle eg $\pi \times \left(\frac{3}{4}h\right)^2 + \pi \times \frac{3}{4}h \times \frac{5}{4}h \left(= \frac{24}{16}\pi h^2\right)$
		P1	for forming and simplifying a correct equation to find height, eg $\frac{24\pi}{16}h^2 = 54\pi$	
		A1	cao	

Paper: 1MA1/3H				
Question	Answer	Mark	Mark scheme	Additional guidance
21 (a)	Sketch	B1	for an appropriate sketch, ie reflection in x axis	Allow some tolerance on the points and in drawing the function if the intention is clear
(b)	(90, 3)	M1	for coordinates of $p = (270, -1)$	May see 270 and -1 marked in the correct positions on the axes
		M1	for describing part of the translation, eg “270” $- 180$, or “ -1 ” $+ 4$ or $[x_p] - 180$, or $[y_p] + 4$ or for an answer of $(90, b)$ or an answer of $(a, 3)$	$[x_p]$, $[y_p]$ must be a numerical value and clearly identified as point P by labelling or on the diagram with no contradiction
		A1	cao	
22	1760	M1	for starting to find the area under the curve, eg $0.5 \times 10 \times 54 (= 270)$ oe or $0.5 \times 10 \times (54 + 76) (= 650)$ oe or $0.5 \times 10 \times (76 + 92) (= 840)$ or for a method to find an estimate for the area of at least 1 strip with heights at intersection of midpoint and curve eg $10 \times [39]$ oe or $10 \times [67]$ oe or $10 \times [86]$ oe	Must have one correct expression for the award of this mark May be seen as a rectangle added to a triangle Where $38 \leq [39] \leq 40$ Where $66 \leq [67] \leq 68$ Where $85 \leq [86] \leq 87$
		M1	for a complete method to find the area under the curve, eg $0.5 \times 10 \times 54 + 0.5 \times 10 \times (54 + 76) + 0.5 \times 10 \times (76 + 92)$ oe eg $0.5 \times 10 (92 + 2(54 + 76))$ or $10 \times [39] + 10 \times [67] + 10 \times [86]$ oe	Allow 1 error in y values used
		A1	for 1760 or 1890 to 1950 SCB2 for an answer in the range 1815 – 1855	Allow 1890 to 1950 only if it comes from midpoint method

Paper: 1MA1/3H				
Question	Answer	Mark	Mark scheme	Additional guidance
23	Sketch graph with minimum point at $(3p, -9p^2 - 7)$ in 4 th quadrant and y intercept at $(0, -7)$	B1	for a curve drawn with intercept at the point $(0, -7)$	where ... can be any constant term(s) but not term(s) in x Allow $(3p)^2$ for $9p^2$ throughout A correct answer with no supportive working gets 0 marks
		M1	for the start of a method to find the turning point, eg $(x - 3p)^2 \dots$ or an x coordinate of $3p$ at the vertex	
		M1	(dep) for a complete correct method to find the turning point, eg $(x - 3p)^2 - 9p^2 - 7$ or substitutes $x = 3p$ into the equation to find y	
		B1	for turning point at $(3p, -9p^2 - 7)$	
		C1	for a sketch of a parabola drawn with intercept at $(0, -7)$ and minimum turning point clearly shown as being at $(3p, -9p^2 - 7)$ in the 4th quadrant.	

Modifications to the mark scheme for Modified Large Print (MLP) papers: 1MA1 3H

Only mark scheme amendments are shown where the enlargement or modification of the paper requires a change in the mark scheme. Notes apply to both MLP papers and Braille papers unless otherwise stated.

The following tolerances should be accepted on marking MLP papers, unless otherwise stated below:

Angles: $\pm 5^\circ$

Measurements of length: ± 5 mm

PAPER: 1MA1_3H		
Question	Modification	Mark scheme notes
1	Wording added: 'Look at the diagram for Question 1 in the Diagram Booklet. It shows a grid.' Wording added: 'below' Value '100' changed to '90'. Table enlarged and left aligned. Frequency values in the table changed from 12, 28, 30, 22, 8 to 10, 25, 30, 20, 5 Wording changed from 'below' to 'in the Diagram Booklet'. For Braille: sentence added 'Bumpons and drawing film are provided if you wish to use them.' Diagram enlarged. Open headed arrows.	Standard mark scheme but points plotted at heights 10, 25, 30, 20, 5
3	Wording added: 'Look at the diagram for Question 3 in the Diagram Booklet. It shows angle ABC' Diagram enlarged. Diagram rotated so that BC is horizontal. For Braille: sentence added 'Drawing film is provided if you wish to use it.'	Standard mark scheme
4	Wording added: 'Look at the diagram for Question 4 in the Diagram Booklet. It shows an incomplete probability tree diagram.' For MLP: wording added 'in the Diagram Booklet. There are five spaces to fill.' For Braille: wording changed 'Complete the probability tree diagram by writing the missing values labelled (i) to (v).' Diagram enlarged.	Standard mark scheme
5	p changed to pence	Standard mark scheme
6	Wording changed: 'Look at the diagram for Question 6 in the Diagram Booklet. It is a stem and leaf diagram showing ...' Diagram enlarged. Horizontal line added at the bottom of the diagram. Key moved above and left of the diagram.	Standard mark scheme

PAPER: 1MA1_3H		
Question	Modification	Mark scheme notes
8	Wording changed: 'Look at the diagram for Question 8 in the Diagram Booklet. It shows a right-angled triangle ABC $BC = 7.6 \text{ cm}$ $\text{Angle } ACB = 62^\circ$ $\text{Angle } ABC$ is a right angle.' Diagram enlarged. Right angle made more obvious. Angle moved outside of the angle arc and angle arc made smaller.	Standard mark scheme
11	Wording changed: 'Look at the diagram for Question 11 in the Diagram Booklet. It shows OAB, a sector of a circle with centre O and radius 4.7 metres.' Diagram enlarged. m changed to metres.	Standard mark scheme
13	Wording changed: 'Look at the diagram for Question 13 in the Diagram Booklet. It shows straight lines ABC and AED' Wording added: 'Angles ABE and ACD are right angles.' Diagram enlarged. Right angles made more obvious. Open headed arrows. Dimensions added to the diagram.	Standard mark scheme
16	Wording added: 'Look at the diagram for Question 16 in the Diagram Booklet. It shows OBCD and DCE on a set of axes.' Diagram enlarged. Open headed arrows. Coordinates added to the diagram.	Standard mark scheme
17	Wording changed: 'Look at the diagram for Question 17 in the Diagram Booklet. It shows triangle ABC $AB = 14.6 \text{ cm}$ $BC = 18.2 \text{ cm}$ $CA = 7.9 \text{ cm}$' Diagram enlarged.	Standard mark scheme

PAPER: 1MA1_3H		
Question	Modification	Mark scheme notes
19	Wording changed: Look at Diagram 1, Diagram 2, Diagram 3 and the formula for Question 19 in the Diagram Booklet. You may be provided with a model. The diagrams and model are NOT accurate. Diagram 1 and the model show a cone. Diagram 2 shows the base of the cone. Diagram 3 shows a side view of the cone. Model provided. Diagram enlarged. 2 additional 2D views added. Formula moved to the Diagram Booklet. Open headed arrows.	Standard mark scheme
21	(a) Wording changed: ‘Look at the diagram for Question 21(a) in the Diagram Booklet. It shows the graph of $y = f(x)$’ Diagram enlarged. Grid cropped. Open headed arrows. For Braille: sentence added ‘Bumpson and drawing film are provided if you wish to use them.’	Standard mark scheme
	(b) Wording changed: ‘Look at the diagram for Question 21(b) in the Diagram Booklet. It shows a sketch of the graph of $y = \sin x^\circ$’ Diagram enlarged. Cross changed to a dot. Open headed arrows.	Standard mark scheme
22	Wording changed: ‘Look at the diagram for Question 22 in the Diagram Booklet. It shows a velocity–time graph for an aeroplane.’ m changed to metres Diagram enlarged.
